

**Rhode Island Codes for VFC and Funding Source Capture and Reporting.**

Providers administering vaccine are required to collect and report VFC Program eligibility (dose level eligibility) and Vaccine Funding Source (Dose level public /private indicator) when reporting immunization administrations electronically to the Registry. Please verify that your practice is capturing and sending this information. Below please find a brief description of the two data, as well as the codes expected in Rhode Island.

- Patient Eligibility Category for Vaccine Funding Program (VFC Eligibility)**  
 This value represents the funding program that should pay for a given immunization. It is determined based on characteristics of the patient/client and the type of vaccine administered.

**Rhode Island currently accepts the following code options for reporting VFC eligibility.**

Code	Label	Definition
V01	Not VFC eligible	Client does not qualify for VFC because they do not have one of the statuses below. (V02-V05)
V02	VFC eligible-Medicaid/Medicaid Managed Care	Client is currently on Medicaid or Medicaid managed care and < 19 years old and the vaccine administered is eligible for VFC funding.
V03	VFC eligible- Uninsured	Client does not have private insurance coverage and < 19 years old and the vaccine administered is eligible for VFC funding.
V04	VFC eligible- American Indian/Alaskan Native	Client is a member of a federally recognized tribe and < 19 years old and the vaccine administered is eligible for VFC funding.
V05	VFC eligible-Federally Qualified Health Center Patient (under-insured)	Client has insurance, but insurance does not cover vaccines, limits the vaccines covered, or caps vaccine coverage at a certain amount and so client is eligible for VFC coverage at a Federally Qualified Health Center. The client must be receiving the immunizations at the FQHC or a FQHC designated clinic and < 19 years old and the vaccine administered is eligible for VFC funding.

**Immunization Funding Source**

These codes indicate the inventory stock (i.e., Public or Private – with a two-stock storage model) from which each vaccine dose was taken.

**Rhode Island currently accepts the following code options for reporting Funding Source**

Concept Code	Concept Name	Definition
PHC70	Private funds	Immunization was funded by private funds, including insurance.
VXC50	Public	Vaccine stock used was publicly funded
