

Got yours?

A flu shot does *every* body good.

Being a first responder often means being a vulnerable patient's first contact in the healthcare system. Getting a flu shot is about more than just protecting yourself. It's about protecting the people who put their lives in your hands.

For more information about flu vaccination clinics for first responders, visit www.health.ri.gov or call the HEALTH Information Line: 401-222-5960 / RI Relay 711.
